## Increase Yields. Eliminate Downtime.

### Proven Jobsite Performance.

The SprayKo design team has pioneered the spray foam industry. Over 20 years of intensive field testing and prototyping has led us to engineer the finest spray foam delivery system in the industry. SprayKo's proven designs increase worker productivity and strict material environments take spray yields to a new level. This is our most versatile build out for the entry level contractor. Three set capacity, air assist doors, 35kW power core with 10 HP Compressor and air dryer. No other contractor can effectively compete with a dealer spraying out of this assembly. Material conditioning and handling is the most efficient design in the industry. The multiple set design plus SprayKo technician training will boost crew confidence and eliminate the downtime to assist the entry technician with soft cavity/rigid structural foams and polyurea coating system deliveries. Reliable high performance equipment and professionally trained crews are the key to establishing and maintaining highly profitable accounts.

### Highlights

- 18' Truck Box Buildout w/14' Pull Out Aluminum Walk Ramp
- Rigid SprayFoam Roof and Walls
- Galvanized Steel Wall/Ceiling Lining
- Diamond Stamped Steel Floor
- Jobsite Automated Transfer Switches
- Industrial Vapor Guard Fluorescent Lighting
- Automated Motor Controlled Ventilation Louvers
- 3 Set Strapless Drum Retention System w/Barrel Dollies
- Hose Recirculation System
- Machine Recirculation System
- Custom Ladder Rack/Deck and Storage Systems
- Additional Storage 5' Under Body Tool Boxes
- 2 T-Stat controlled 700w Control Room Floor Heaters
- 220 Volt Overhead Auxiliary Control Room Heater

### Respiratory Equipment

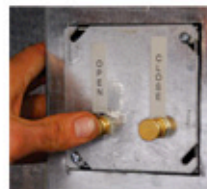

- Premium Ambient Fresh Air System w/ CO Alarm
- Full Mask, Lens, 300' Hose, Hose Rack, Wall-Panel Filtration

# Features

## Ventilated Workbench

Worker safety and productivity is SprayKo's highest priority. Spray technicians and work areas are protected by a 500cfm ventilation hood that prevents inhalation and buildup of airborne solvents.

SprayKo's exclusive pneumatic door system is operated with the push of a button.

## Power Core

Genset and air equipment are placed behind an OSHA approved sound wall and firewalled to maximize safety. SprayKo engineers designed our power core to maximize uptime by providing the highest quality air and power to your Graco equipment while also making maintenance pain free.

## Racks and Storage

In addition to ample underbox storage and ladder racks, SprayKo rigs come equipped with storage for all of your ancillary spray products. An organized rig keeps you profitable and productive.

## Genuine Graco Parts and Equipment

## Graco Equipment Specs

- E-30 Reactor 10.2Kw 50A-230V 3-Phase
- Fusion AP Round Pattern Spray Gun
- 210ft 2000 psi 3/8" Heated Hose w/ Scuff Guard and 10ft Helix Whip
- 2 T1 Transfer Pumps w/ Dessicant System
